

Every Vendor, Assessed And Assured

AI-powered third-party risk management that takes you from vendor onboarding to risk verdict - without the spreadsheets, the manual effort, or the blind spots.

- AI-Powered
- Automated Assessment
- Continuous Monitoring
- Audit-Ready

70%

Reduction in manual assessment effort

AI-Driven

Assessment framework generation, no templates needed

One Platform

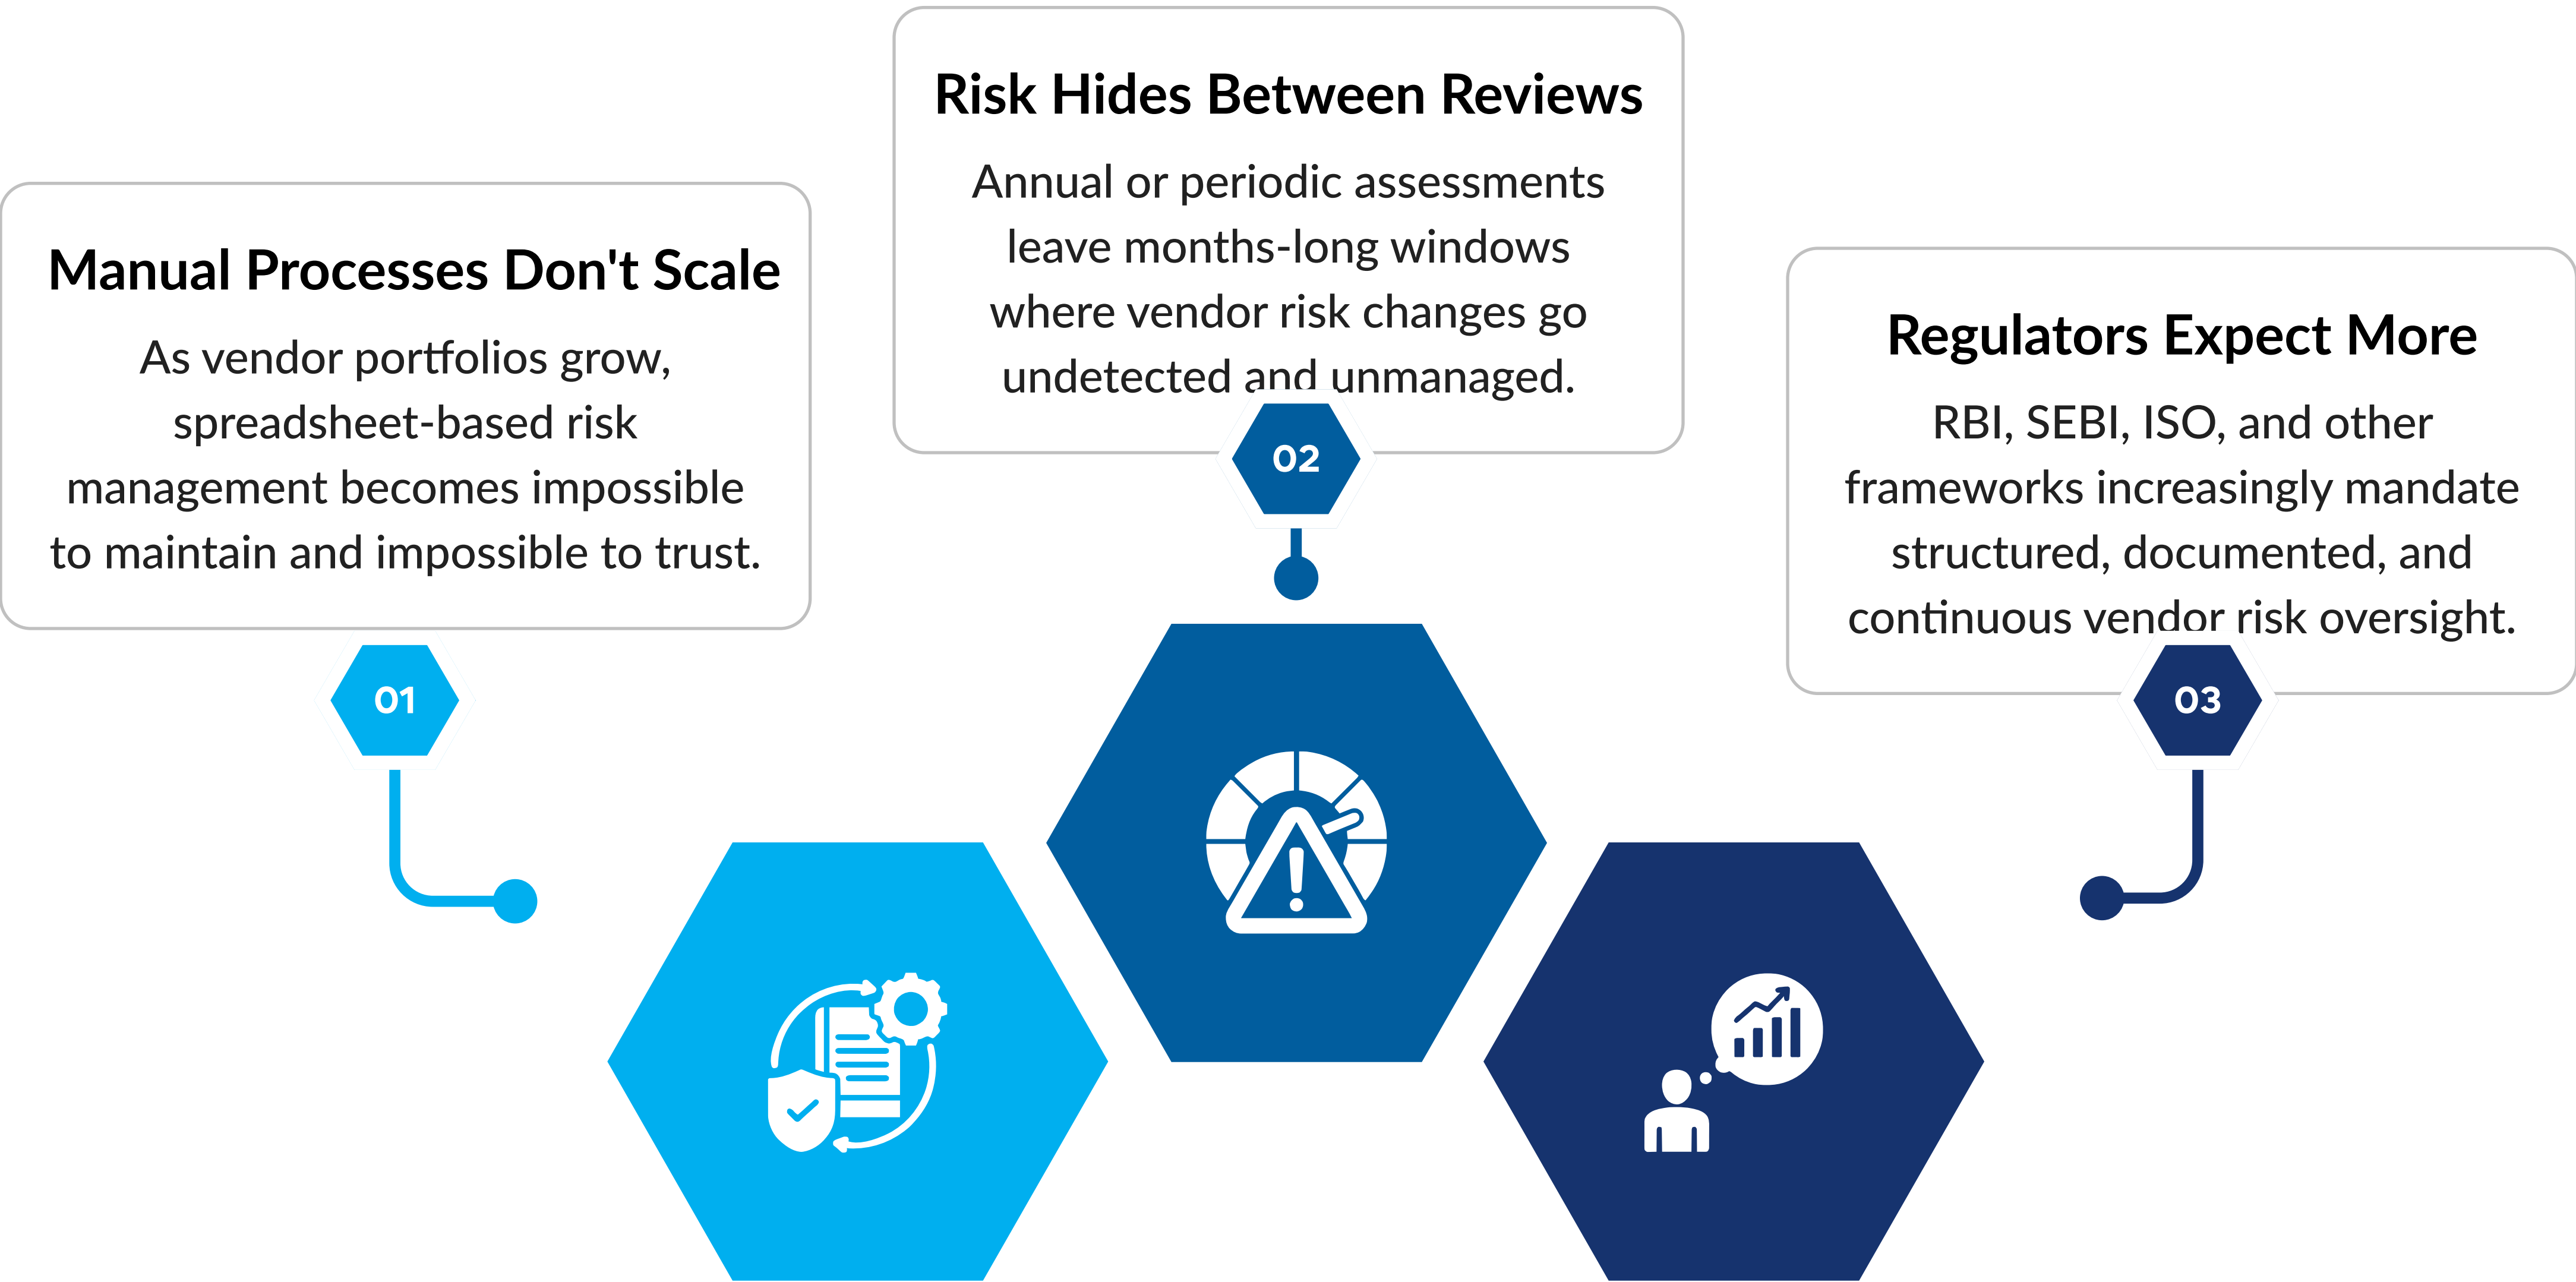

Onboarding to monitoring to reporting

THE CHALLENGE

Every vendor connection expands your unseen risk surface

Every vendor relationship you maintain is an extension of your risk surface. A supplier with weak security, a partner with lapsed compliance, a cloud provider with misconfigured access - these aren't just their problems. Under modern regulatory frameworks, they are yours.

Yet most organizations still manage third-party risk through spreadsheets, generic assessment forms, and annual reviews that reveal nothing about what's happening with your vendors right now.

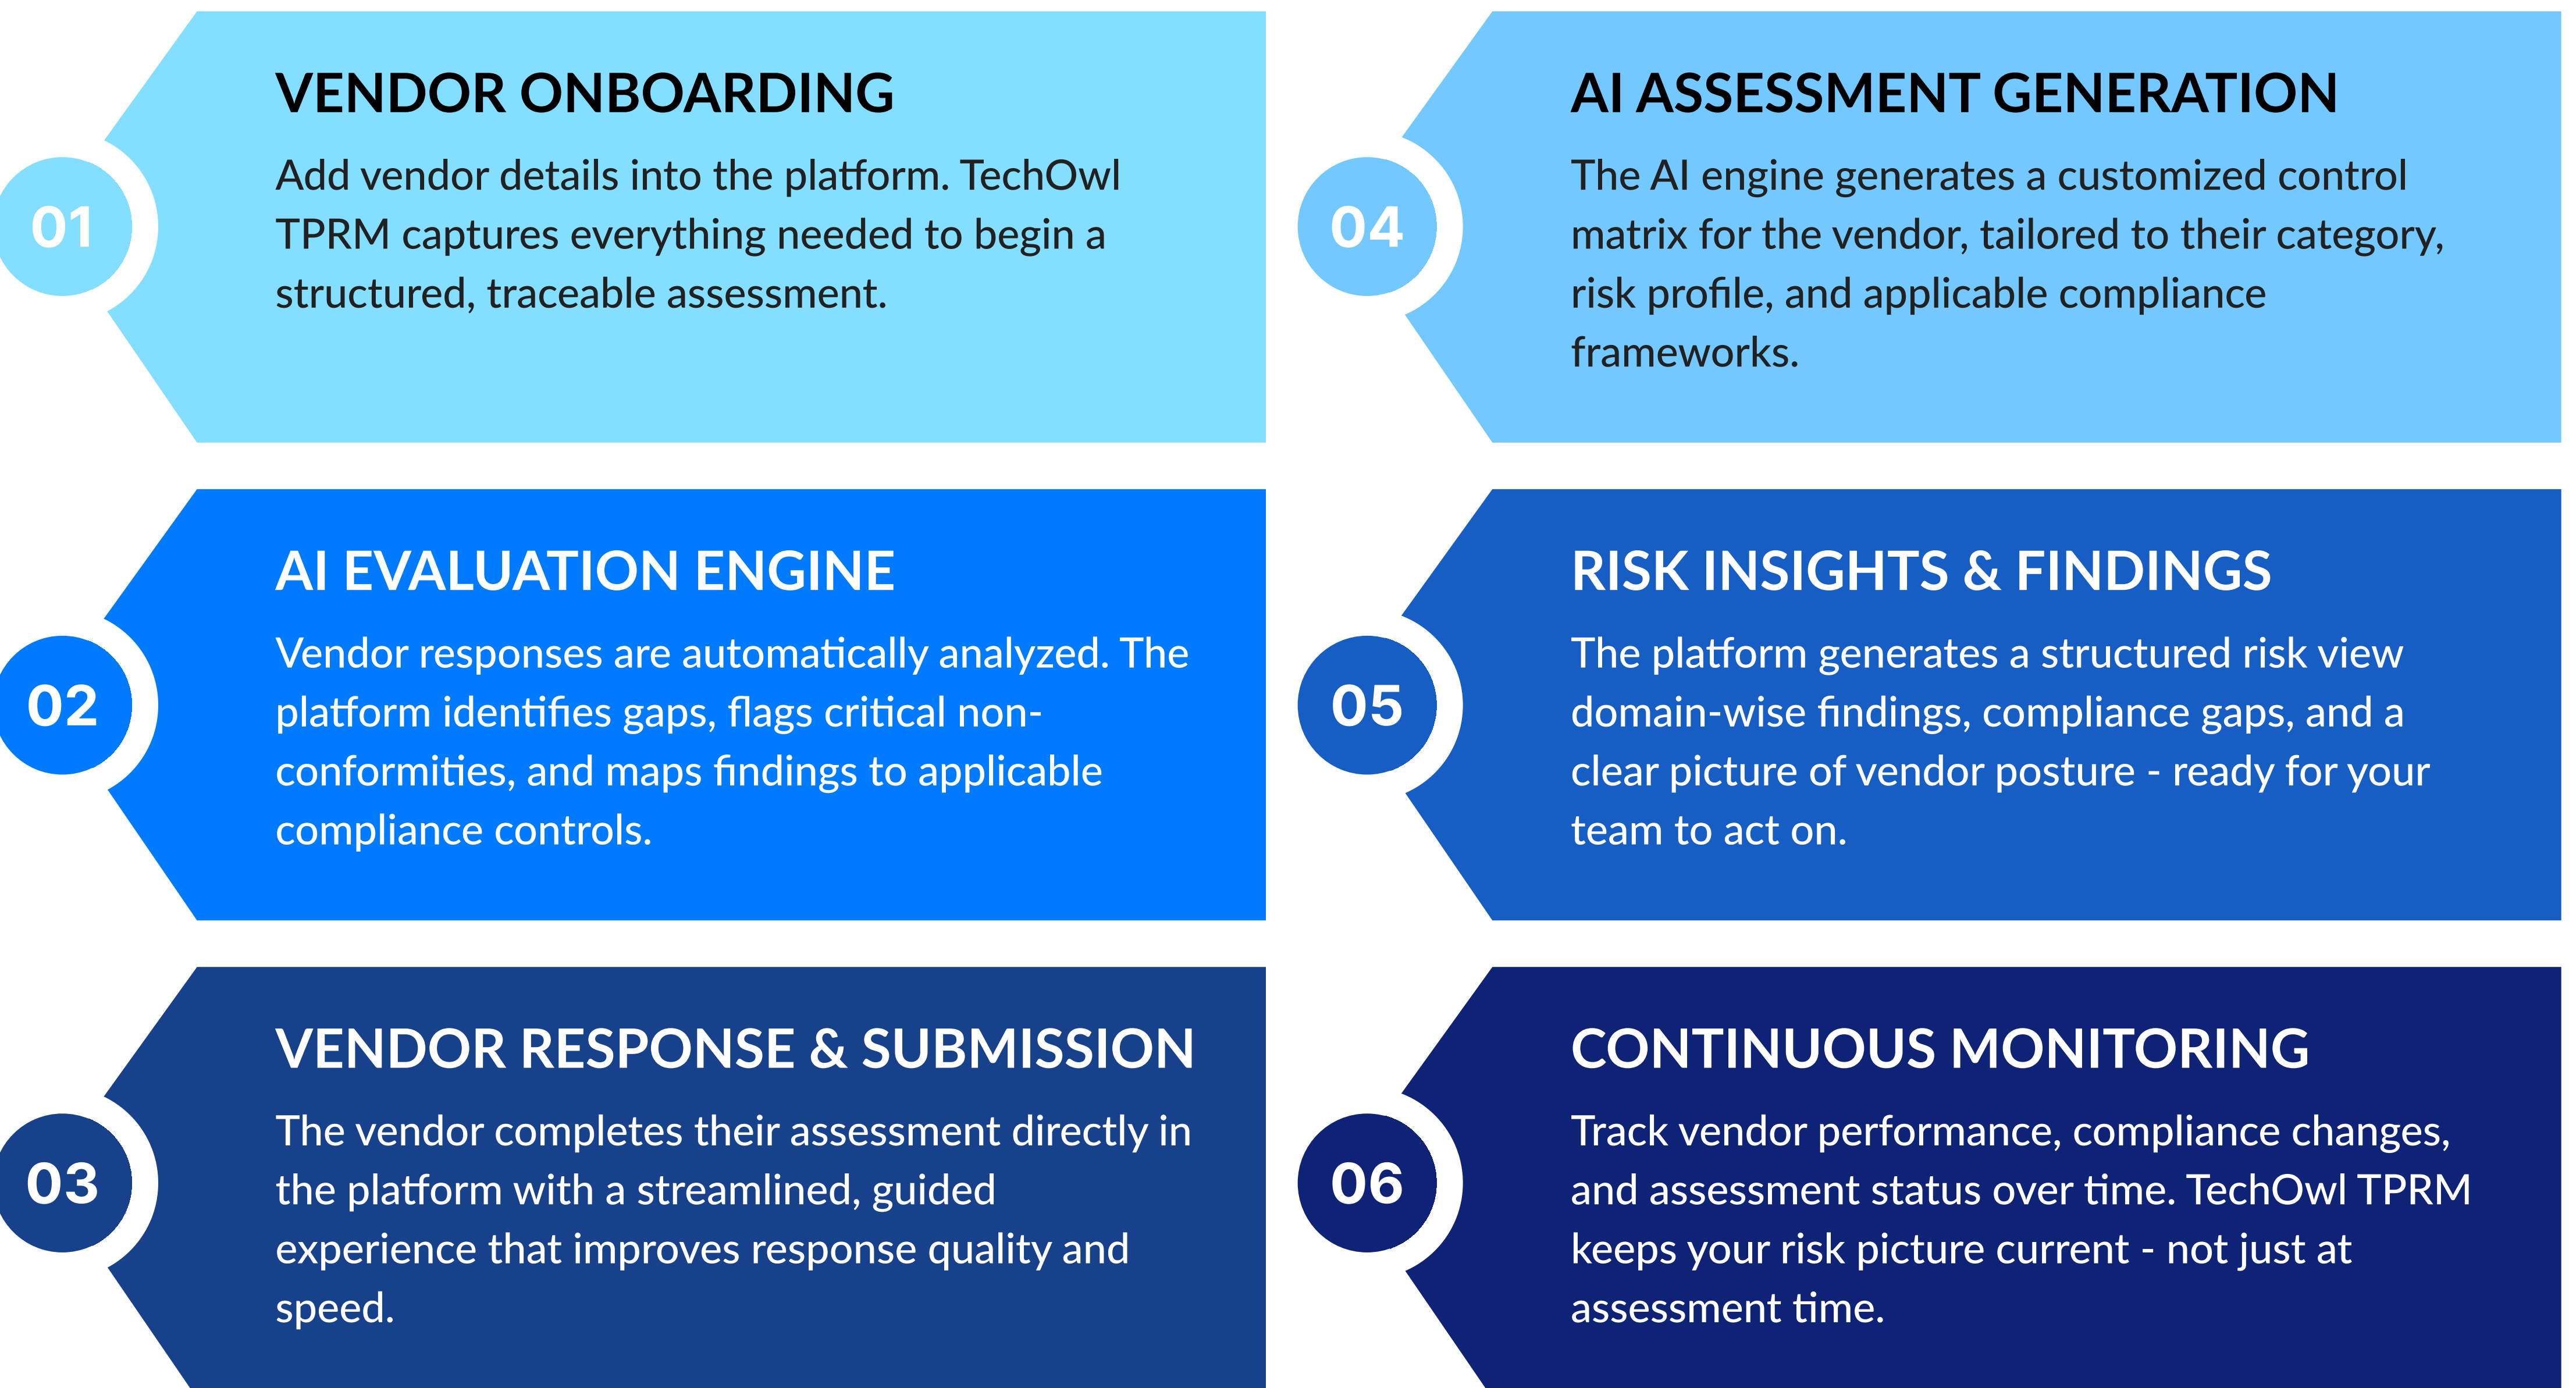

THE SOLUTION

TechOwl TPRM - Intelligent Vendor Risk, Fully Under Control

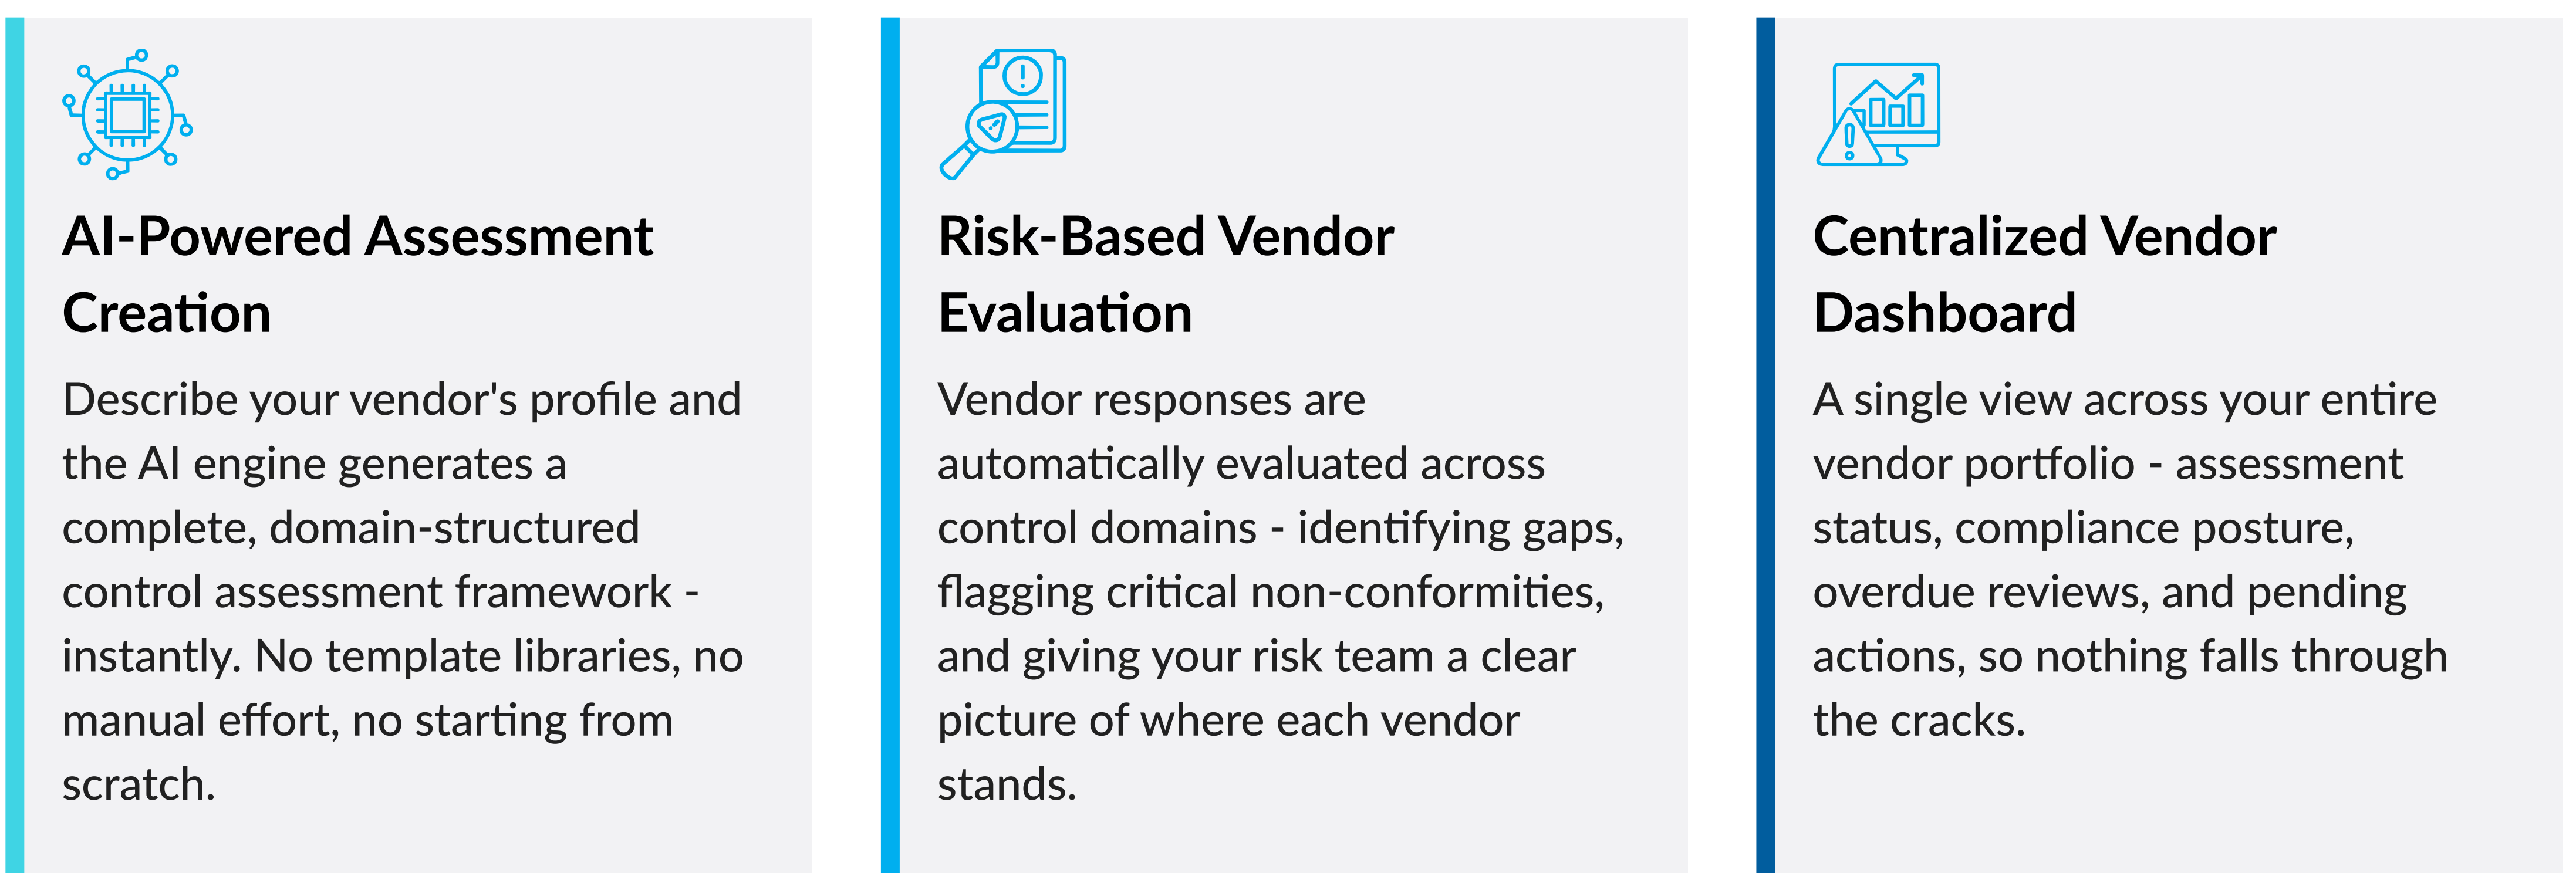

TechOwl TPRM is an AI-powered third-party risk management platform that automates the entire vendor assessment lifecycle - from onboarding and assessment framework generation to evaluation, monitoring, and executive reporting.

It removes the manual bottlenecks that make vendor risk programs slow, inconsistent, and hard to scale - replacing them with intelligent automation that gives your risk team clear, reliable vendor intelligence without the overhead.

PLATFORM CAPABILITIES

Everything Your Risk Team Needs - Without the Manual Work

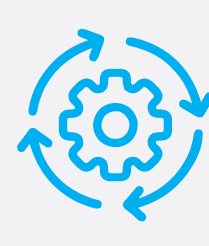

Executive Reporting Engine

Automatically generate presentation-ready reports with domain-wise findings, compliance mapping, and visual risk summaries - built for leadership reviews and audit submissions without any manual formatting.

Continuous Vendor Monitoring

Risk doesn't stop at assessment completion. TechOwl TPRM tracks vendor compliance posture, flags changes, and alerts your team to emerging risks between formal review cycles.

Workflow & Lifecycle Management

Track every assessment from initiation to closure - with status visibility, overdue alerts, reviewer assignments and a full audit trail that keeps your TPRM program accountable and documented.

COMPLIANCE COVERAGE

Built Around the Frameworks That Matter to Your Regulators

TechOwl TPRM doesn't treat compliance as an afterthought. Assessment frameworks are structured around the specific control requirements of the regulations your organization must satisfy - so every vendor evaluation directly supports your broader compliance posture.

RBI

Cyber Security & Outsourcing Compliance

SEBI

Cyber Resilience & Vendor Governance Alignment

ISO 27001

Information Security Control Mapping

NIST CSF

Security Assessment Framework Alignment

SOC 2

Control Visibility & Vendor Trust Evidence

Also includes GDPR-related vendor control checkpoints - ensuring data protection obligations extend through your third-party relationships.

BUSINESS OUTCOMES

What Changes When Vendor Risk Is Actually Managed

Your Vendor Risk Program Scales Without Adding Headcount

AI-generated assessments and automated evaluation eliminate the manual effort that makes vendor risk programs collapse under their own weight.

Risk Stays Visible Between Formal Review Cycles

Continuous monitoring means vendor compliance changes are caught when they happen - not discovered months later during the next scheduled assessment.

Onboarding New Vendors Is Faster For Everyone

A streamlined vendor - facing experience and automated assessment generation cuts onboarding time dramatically.

Audit Preparation Is No Longer A Crisis

A continuous, documented assessment trail means audit evidence is ready when you need it - not assembled under pressure.

Leadership Always Knows Where Vendor Risk Stands

Automated executive reports give your CISO and board a clear, current picture of third-party risk - without your team spending days compiling it.

Every Vendor Assessment Is Consistent And Defensible

Standardized, framework-aligned assessments replace ad-hoc processes, giving you a vendor risk program that holds up under regulatory scrutiny.

WHO IT'S FOR

Built for Every Stakeholder in Your Vendor Risk Program

For Organizations

- ✓ Reduce manual effort by up to 70%
- ✓ Faster vendor onboarding cycles
- ✓ Stronger compliance & audit readiness
- ✓ Complete visibility across all vendor relationships

For Vendors

- ✓ Streamlined, guided assessment experience
- ✓ Faster response and submission process
- ✓ Clear requirements - no ambiguity
- ✓ Stronger vendor - client trust relationship

For Risk Teams

- ✓ AI-assisted insights - not gut feel
- ✓ Eliminate redundant assessments
- ✓ Focus attention on highest-risk vendors
- ✓ A defensible, documented risk program

USE CASES

Where TechOwl TPRM Makes the Difference

Vendor Risk Assessment

Assess every vendor against structured, framework-aligned control domains consistently, automatically.

Regulatory Audits

Produce complete, documented evidence of third-party risk management for regulatory submissions and inspections.

Cybersecurity Vendor Review

Evaluate the security posture of technology and cloud vendors that have access to your environment or data.

Procurement Risk

Integrate risk evaluation into procurement decisions - before a vendor relationship is formalized.

Regulatory Vendor Reviews

Meet RBI, SEBI, and other sector-specific mandates for documented, ongoing third-party governance.

WHY TECHOWL VENDOR SHIELD

AI-Powered vs Conventional - There Is No Contest

Conventional vendor risk processes rely on static assessment forms, manual consolidation, and periodic reviews that create more paperwork than insight. TechOwl TPRM replaces all of it with intelligent automation that scales with your vendor portfolio.
